

Position: STRUCTURAL ENGINEER – Full-time employee

Office Location: Minneapolis, Minnesota

Description

Meyer Borgman Johnson is seeking an engineer with 1-5 years of experience to primarily assist with structural condition assessment documentation and restoration project work related to parking facilities. The position is full-time with salary and benefits commensurate with experience level and qualifications.

Minimum Qualifications

- B.S. or M.S. in Civil Engineering with structural emphasis
- 1-5 or more years of industry experience
- Experience or interest with site observation, structural condition assessments, forensic engineering, non-destructive evaluation methods, failure mechanisms and/or concrete restoration preferred
- Strong verbal and written communication skills
- Team player and proven positive attitude when working with both internal and external colleagues, clients, and contractors

Organization and Professional Qualities

- Manages project tasks for a coordinated effort to meet project schedules and budgets
- Ability to work independently on multiple, variable duration projects
- Effectively utilizes team members for the successful completion of projects
- Curiosity and attention to detail are vital for competent and thorough investigation work
- Suggests possible solutions for improvement of internal processes
- Listens to client needs and expectations
- Effective communication skills with project team, clients, and contractors

Responsibilities

- 8-16 hours per week, local on-site field observation/assessment in all seasons and weather conditions
- Physically capable of and willingness to access investigation areas in variety of environments
- Document site observation through written condition assessment reports
- Creates and executes project work plans and revises plans to meet changing requirements
- Identifies and utilizes all available resources to move multiple projects towards completion
- Familiarity with structural analysis software including RAM, RISA 3D, ADAPT and others
- Manages all aspects of a project and reviews deliverables before delivering to client
- Applies the firm's methodology and enforces project standards and quality assurance procedures
- Manages project budgets
- Manages client requests and day-to-day client interaction

Benefits

- Competitive pay and benefits commensurate with experience and qualifications, including health, dental, disability, flex-benefits, 401k, and flexible schedule.
- Flexibility to shape your career path and grow with the firm

STRUCTURAL ENGINEER – Full-time employee
